

# MOOREA FUND STERLING BOND FUND STRATEGY

## Monthly Factsheet

### INVESTMENT OBJECTIVE

The investment objective of the Sub-Fund is to generate a return which exceeds that of a benchmark which is 50/50 split in (i) Merrill Lynch 1-10 year UK Gilt Index TR and in (ii) Merrill Lynch 1-10 year Sterling Corporate Index TR. The Sub-fund is actively managed with reference to the following benchmarks: 50% Merrill Lynch 1-10 years UK Gilt Index TR and 50% Merrill Lynch 1-10 years Sterling Corporate Index TR. The benchmarks are used for performance comparison.

### MANAGEMENT COMMENTARY (QUARTERLY)

In the second quarter of 2024, bond markets were generally a bit more positive than what we had seen in the first quarter. The Bank of England and Federal Reserve have kept markets waiting for rate cuts. The European Central Bank did initiate its first rate cut in early June, cutting by 25 basis points to 3.75%. Over the quarter, the UK 10-Year Gilt yield moved higher from 4.08% to 4.17%, while oscillating between highs of 4.39% and lows of 4.05% several times. The tug of war between strong economic data, inflation, and interest rate expectations has kept volatility in the rates market relatively high by historical standards. Because of this volatility in rates, longer-dated Gilts, which are more sensitive to these changes, underperformed shorter-dated Gilts. The 1-10-year Gilt index posted a return of 0.04% compared to the 0-5-year Gilt index returning 0.59% over the quarter. For corporate bonds, the picture was somewhat brighter, helped by strong economic fundamentals driving credit spreads tighter over the period. The 1-10-year sterling corporate index posted a positive return of 0.48% over the quarter while the shorter-dated 1-5-year sterling corporate index returned 0.83%. Over the quarter, the Moorea Sterling Bond Fund posted a return of 0.10% after all costs. 16bps behind the gross benchmark which return 0.26% over the same period. We are positioned to take advantage of interest rates eventually coming down, but changing expectations towards the future path of monetary policy have caused this positioning to be a drag on performance over the quarter. As a house we believe that the next step for interest rates is down, it is just a question of when and we are well positioned to take advantage when they eventually do.

Actual weighting and investment allocations are subject to change on an ongoing basis and may not be exactly as shown. Investors should understand the different asset classes which make up the strategy as they have different risk characteristics. Investments may be subject to market fluctuations and the price and value of investments and the income derived from them can go down as well as up. Your capital may be at risk and you may not get back the amount you invest. The tax benefits and liabilities will depend on individual circumstances and may change in the future.

The content of this document should not be interpreted as an investment service or as investment advice, and under no circumstances is it to be used or considered as an offer or incentive to purchase or sell a particular product. The content is intended for information purposes only and to provide investors with the relevant reference information for any investment decisions. It has no regard to the specific financial objectives of any individual investor, nor may it be construed as legal, accounting or tax advice. Past performance is no indication of future results.

Similarly, the present document is not intended as an incentive, offer or solicitation to invest in the asset categories listed herein. Investors are warned that the placing of stock market orders requires a perfect understanding of the markets and their governing legislation. Before investing, they must be aware that certain markets may be subject to rapid fluctuations and are speculative or lacking in liquidity. Accordingly, certain assets or categories of assets listed in the present document may not be appropriate for investors. In certain cases, investments may even bear an indeterminate high risk of loss that exceeds the initial investment made. Investors are therefore urged to seek the advice of their financial advisor or intermediary in order to assess the particular nature of an investment and the risks involved and its compatibility with their individual investment profile and objectives.

For Swiss investors: the Sub-Fund has been authorised for public sale by the Commission de Surveillance du Secteur Financier in Luxembourg and for public offering in Switzerland by the Swiss Financial Market Supervisory Authority (shortly 'FINMA'). The prospectus, the KIID (Key Investor Information Document) and annual reports of the Fund are available on the website [www.fundinfo.com](http://www.fundinfo.com) and can be obtained from our Representative and Paying Agent in Switzerland: Société Générale, Paris, succursale de Zurich, Talacker 50, Case postale 1928, 8021 Zurich.

# MOOREA FUND STERLING BOND FUND STRATEGY

## RISK INFORMATION

Risks are managed through diversification across different asset classes to eliminate concentration at each level. Below we explain the risk ratings of this fund.

### UCITS RISK & REWARD GRADING

Less risky      ①   ②   ③   ④   ⑤   ⑥   ⑦      More risky

## DEFINITION OF UCITS RISK

This risk classification is a Synthetic Risk and Reward Indicator (SRRI) as required for UCITS funds. The Fund has been defined as a Total Return Fund as required by the guidelines of the Committee of European Securities Regulators. The SRRI has been calculated using the five year historic monthly volatility of portfolios managed to this strategy.

The computation of the Synthetic Risk and Reward Indicator of UCITS shall be carried out according to the following grid of annualized volatility intervals ('buckets').

The grid provides volatility intervals which reflect the increasing level of risk borne by the fund and, therefore, its position in the risk scale.

- 1 Less or equal 0.5%
- 2 Between 0.5% to 2%
- 3 Between 2% to 5%
- 4 Between 5% to 10%
- 5 Between 10% to 15%
- 6 Between 15% to 25% (excluded)
- 7 Above 25%

Historical data is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and that the categorisation of the Fund may move over time.

## RECURRING COSTS (ONGOING CHARGES)

The recurring costs (ongoing charges) figure represents all annual charges, and other payments taken from the assets of the Fund. This figure is disclosed in the Key Investor Informational document (KIID) (UCITS standard). The following fees are taken into account in the amount to be disclosed: management fees, fund administration fees (custody, transfer agent, audit, Net Asset Value accounting, legal, compliance...) and, where the Fund invests a proportion of its assets in other funds, the ongoing charges incurred in the underlying funds. Ongoing charges are based on the expenses for the last financial year ended 31 December 2017. They may vary from year to year according to fund size and underlying holdings.
