## MANAGEMENT COMMENTARY (QUARTERLY)

The month of December closed on a note reminiscent of 2024, a year in which uncertainties were still the order of the day, as symbolized by stock market indices that moved in fits and starts. Between Donald Trump's election in the US and its still poorly understood consequences, central banks with their fingers on the pulse of interest rates but no real global coherence, inflation stabilized but still undecided, geopolitical tensions as inextricable as ever (Middle East, Ukraine) and China's economic situation which seems to be improving but still needs confirmation, the trajectory of the coming months remains difficult to anticipate. These events have a very different impact on each country, leading to greater geographical selectivity in the markets, with very different reactions from one zone to another, as demonstrated this year by the disparate performances of the European markets between the southern European states (Spain, Italy), whose stock markets are up by almost 12% in 2024, and France, penalized (-2.15% on the CAC) by its economy and political situation since the summer. Over the month, we can also see these performance differences from one continent to another: CAC40 +2.01%, MSCI Europe -0.49%, MSCI USA -0.63%, MSCI EMERGING +1.86%, MSCI JAPAN +1.65%, (in €, Net Return indices). This selectivity is also reflected in capitalization sizes, always to the detriment of smaller, less liquid and more volatile stocks (PEA PME 150 Enternext index -15.13%, MSCI Europe Micro +2.51% versus +8.47% for the MSCI Europe Large Cap in 2024). Against this backdrop, our fund ended the year down -0.45%, but up +9.84% for the year as a whole.
