

MOOREA FUND CLIMATE ACTION

Monthly Factsheet

INVESTMENT OBJECTIVE

This actively managed sub-Fund seeks to provide long term capital appreciation (5 years) and generate a positive environmental impact through investments in shares issued by companies that operate in green eco-activities and develop solutions and businesses that actively contribute to the environmental transition. Green eco-activities include, but not limited to renewable energies, energy efficiencies, green mobility, green buildings, sustainable water and agriculture, circular economy. The Sub-Fund is actively managed with reference to the following benchmark: MSCI ACWI. The benchmark is used both for performance comparison and as a universe from which to select securities. It is specified that the investment universe of the MSCI ACWI index is not binding on the Investment Manager as the latter can select, in addition to the investment universe of the MSCI ACWI index, 0 to 20 securities of companies out of the MSCI ACWI index.

MANAGEMENT COMMENTARY (QUARTERLY)

The equity markets continued to rise during the 1Q 2024 on the slowing inflation and improving business sentiment. The last quarter of 2023 reporting season was rather positive with companies reporting in majority the results better than expected. The artificial intelligence stocks Nvidia, ASML and Microsoft, discussed in that occasion the prospects much higher than already very positive analysts predictions, adding to the upside move of the equity markets. In that way, the markets pursued the concentration around the largest capitalization – the magnificent 7 in the US and the 7 wonders in Europe. On the other side, the smaller growth companies or the sectors linked to the interest rates, such as utilities, suffered during the quarter as the Central banks in Europe and US delayed the first interest rate cuts probably to June.

Within the Moorea Climate Action fund, the currently largest weighted eco-sector Energy Efficiency was also the best contributor to the performance, led by the tech companies Nvidia, SAP, IBM or Microsoft. The renewable energies detracted again. The largest detractor in the sector was EDP Renovaveis, which suffered alongside other utilities on the later than previously expected cut in interest rates. The solar and wind industry was again hurt by a mix of bad results. In the sustainable mobility eco-sector, Tesla traded lower during the trimester. The competition from the other electric vehicles producer is intensifying and in China, BYD producer, also invested within the fund, has overtaken Tesla as the number one in sales.

With the large concentration of the markets around several stocks and the high volatility of the pure Climate Action theme equities, the Portfolio Manager has decided to reduce the tracking error. The diversification pocket of Net Zero leaders was added to the portfolio. This pocket is invested from now on, in the world ESG leaders, who have a strong net zero alignment approach. Its objective is to reduce the volatility of the portfolio and its maximum weight can be 20%. Within these leaders, you can find pharmaceutical company Eli Lilly, European semiconductor equipment producer ASML or payment provider Visa.

GLOSSARY and DISCLAIMER

ESG RATING

MSCI ESG Ratings aim to measure a company's resilience to long-term, financially relevant ESG risks (Environment, Social et Gouvernance). For each company a Weighted Average Key Issue Score is calculated based on the underlying Key Issue scores and weights. To arrive at a final letter rating, this score is normalized by industry. **The Industry Adjusted Score corresponds to a rating between AAA and CCC.** These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.

*The ESG quality score of the universe is adjusted for the 20% lowest ESG scores.

Letter Rating	CCC	B	BB	BBB	A	AA	AAA
Score	0 - 1.4	1.4-2.9	2.9-4.3	4.3-5.7	5.7-7.1	7.1-8.6	8.6-10

CARBON FOOTPRINT

As key climate change indicators, Greenhouse gas emissions (GHG) are classified as per the Greenhouse Gas Protocol and are grouped in three categories:

- ▶ **Scope 1 - Direct scope:** GHG emissions are those directly occurring from sources that are owned or controlled by the institution.
- ▶ **Scope 2 - Indirect scope:** GHG emissions are indirect emissions generated in the electricity production consumed by the institution.
- ▶ **Scope 3 - Indirect scope:** GHG emissions are all the other indirect emissions that are consequences of the institution's activities, but that occur from sources not owned and controlled by the institution.

The uses MSCI data who are based on declarative or estimated figures from companies. It aims to take into account the GHG emissions of Scope 1 and 2, produced by the companies held in the portfolio. GHG emissions are compared to the sales of each company and adjusted with the security weight in the portfolio. Emissions are expressed in carbon dioxide equivalent (CO₂e).

SUSTAINABLE IMPACT REVENUES

Revenue exposure to Sustainable Impact Solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

COVERAGE MSCI

The ESG MSCI rating does not cover all issuers, so it is important to display the coverage ratio to understand the rating. On this document, the rating coverage is displayed as a percentage (%), i.e. the percentage of covered securities on the entire portfolio.

DISCLAIMER

The content of this document should not be interpreted as an investment service or as investment advice, and under no circumstances is it to be used or considered as an offer or incentive to purchase or sell a particular product. The content is intended for information purposes only and to provide investors with the relevant reference information for any investment decisions. It has no regard to the specific financial objectives of any individual investor, nor may it be construed as legal, accounting or tax advice. Past performance is no indication of future results.

Similarly, the present document is not intended as an incentive, offer or solicitation to invest in the asset categories listed herein. Investors are warned that the placing of stock market orders requires a perfect understanding of the markets and their governing legislation. Before investing, they must be aware that certain markets may be subject to rapid fluctuations and are speculative or lacking in liquidity. Accordingly, certain assets or categories of assets listed in the present document may not be appropriate for investors. In certain cases, investments may even bear an indeterminate high risk of loss that exceeds the initial investment made. Investors are therefore urged to seek the advice of their financial advisor or intermediary in order to assess the particular nature of an investment and the risks involved and its compatibility with their individual investment profile and objectives.

For Swiss investors: the Sub-Fund has been authorised for public sale by the Commission de Surveillance du Secteur Financier in Luxembourg and for public offering in Switzerland by the Swiss Financial Market Supervisory Authority (shortly 'FINMA'). The prospectus, the KIID (Key Investor Information Document) and annual reports of the Fund are available on the website www.fundinfo.com and can be obtained from our Representative and Paying Agent in Switzerland: Société Générale, Paris, succursale de Zurich, Talacker 50, Case postale 1928, 8021 Zurich.

CONTROVERSY

An ESG Controversy may be defined as an incident or ongoing situation in which a company faces allegations of negatively impacting stakeholders (i.e.: workers, communities, the environment, shareholders, or society at large), via some type of wrongdoing across several ESG indicators. The aim of ESG Controversies research is to assess the severity of the negative impact of each situation, rather than the extent of negative press attention or public opprobrium.

For each issuer, the ESG rating comes along with a Controversy flag which reflects the lowest flag among analyzed key indicators.

- ▶ **Green flag:** the company is not involved in major recent controversies
- ▶ **Yellow flag:** in recent moderate-to-severe level controversies
- ▶ **Orange flag:** one or more recent severe structural controversies that are ongoing
- ▶ **Red flag:** one or more recent very severe controversies

Controversy flag translates also into controversy score:

Red 0 - Orange 1 - Yellow 2 to 4 - Green 5 to 10

SCIENCE-BASED TARGETS

Science-based targets provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their greenhouse gas emissions. Targets adopted by companies to reduce greenhouse gas (GHG) emissions are considered "science-based" if they are in line with the goals of the Paris Agreement –to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C.

IMPACT INDICATORS

The impact indicators allow us to report on the environmental, social and governmental commitment of our investments in a relevant and sustainable manner. The six indicators displayed are not an exhaustive list, but were chosen by the management company. Women on the Board: This figure represents the percentage of women on the board of directors of companies. Independent directors: This figure represents the percentage of board members who meet the independence criteria defined by MSCI. For companies with a management and supervisory board, the calculation is based on supervisory board members only.

UNITED NATIONS GLOBAL COMPACT

The United Nations Global Compact is a non-binding United Nations pact to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on their implementation. The UN Global Compact is a principle-based framework for businesses, stating ten principles in the areas of human rights, labor, the environment and anti-corruption. The UN Global Compact is the world's largest corporate sustainability initiative with 13000 corporate participants and other stakeholders over 170 countries with two objectives: "Mainstream the ten principles in business activities around the world" and "Catalyse actions in support of broader UN goals, such as the Millennium Development Goals (MDGs) and Sustainable Development Goals (SDGs)".

ESG LUXFLAG LABEL

LuxFLAG is an independent, non-profit, international association created in Luxembourg in July 2006. The objective of the LuxFLAG ESG Label is to reassure investors that the labelled funds actually incorporate ESG (Environmental, Social and Governance) criteria throughout the entire investment process.
