

MOOREA FUND CLIMATE ACTION

Monthly Factsheet

INVESTMENT OBJECTIVE

This actively managed sub-Fund seeks to provide long term capital appreciation (5 years) and generate a positive environmental impact through investments in shares issued by companies that operate in green eco-activities and develop solutions and businesses that actively contribute to the environmental transition. Green eco-activities include, but not limited to renewable energies, energy efficiencies, green mobility, green buildings, sustainable water and agriculture, circular economy.

The Sub-Fund is actively managed with reference to the following benchmark: MSCI ACWI. The benchmark is used both for performance comparison and as a universe from which to select securities. It is specified that the investment universe of the MSCI ACWI index is not binding on the Investment Manager as the latter can select, in addition to the investment universe of the MSCI ACWI index, 0 to 20 securities of companies out of the MSCI ACWI index.

Actual weighting and investment allocations are subject to change on an ongoing basis and may not be exactly as shown. Investors should understand the different asset classes which make up the strategy as they have different risk characteristics. Investments may be subject to market fluctuations and the price and value of investments and the income derived from them can go down as well as up. Your capital may be at risk and you may not get back the amount you invest. The tax benefits and liabilities will depend on individual circumstances and may change in the future.

RISK INFORMATION

Risks are managed through diversification across different asset classes to eliminate concentration at each level. Below we explain the risk ratings of this fund.

UCITS RISK & REWARD GRADING

Less risky  More risky

DEFINITION OF UCITS RISK

This risk classification is a Synthetic Risk and Reward Indicator (SRRI) as required for UCITS funds. The Fund has been defined as a Total Return Fund as required by the guidelines of the Committee of European Securities Regulators. The SRRI has been calculated using the five year historic monthly volatility of portfolios managed to this strategy.

The computation of the Synthetic Risk and Reward Indicator of UCITS shall be carried out according to the following grid of annualized volatility intervals ('buckets').

The grid provides volatility intervals which reflect the increasing level of risk borne by the fund and, therefore, its position in the risk scale.

- 1 Less or equal 0.5%
- 2 Between 0.5% to 2%
- 3 Between 2% to 5%
- 4 Between 5% to 10%
- 5 Between 10% to 15%
- 6 Between 15% to 25% (excluded)
- 7 Above 25%

Historical data is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and that the categorisation of the Fund may move over time.

ONGOING CHARGES

The ongoing charges figure represents all annual charges, and other payments taken from the assets of the Fund. This figure is disclosed in the Key Investor Informational document (KIID) (UCITS standard). The following fees are taken into account in the amount to be disclosed: management fees, fund administration fees (custody, transfer agent, audit, Net Asset Value accounting, legal, compliance...) and, where the Fund invests a proportion of its assets in other funds, the ongoing charges incurred in the underlying funds. Ongoing charges are based on the expenses for the last financial year ended 31 December 2017. They may vary from year to year according to fund size and underlying holdings.
