

# MOOREA FUND SG CREDIT MILLESIME 2028

## Monthly Factsheet

### INVESTMENT OBJECTIVE

The investment objective of the Moorea Fund - SG Credit Millesime 2028 sub-fund is to generate steady returns over the predefined investment horizon, by investing in bonds that have a positive environmental impact and whose selected issuers follow good social and governance practices.

The Sub-Fund is actively managed. The following indices are used as a universe from which to select securities: BofA Euro Corporate (ER00) Index and BofA Euro High Yield BB (HE10 Index). The index ICE BofA 3-5 Year Euro Corporate (ER02 Index) may be used for performance comparison. This benchmark is not intended to be consistent with the sustainable investment objective of the Sub-Fund.

### MANAGEMENT COMMENTARY (QUARTERLY)

While equity investors greeted with enthusiasm the strong economic data published over the 1<sup>st</sup> quarter of the year (US Q4-23 GDP growth, US PMIs), it was definitely a more challenging period for fixed income investors – as the volatility of the bond market has been surprisingly strong. Sticky inflation prints, resilient economic activity, and the Federal Reserve (Fed) somewhat backpedaling on its dovish tone all together combined to drive negative returns for bonds. End of 2023, investors were optimistic that a soft landing was in store for the economy, whereby a recession would be avoided, inflation would continue to decrease, and the Fed would start cutting interest rates in March. But inflation data together with the strength of the US economy, pushed him to adopt a more centrist tone and delayed the prospects of the first rate cut. Not only has the US economy avoided recession, but it's been stronger than expected. In the meantime, inflation has again turned sticky, and Fed rate cuts were pushed out to June. As a result, investors previously priced in 5 cuts in 2024, but expectations now center on 3 "at the very best". All in all, market anticipations for long-term inflation have peaked at -2.7% at Q1-end, the highest level since November. In Europe, the ECB has maintained its data-driven policy and is seen cutting rates faster than the Fed. Long considered as a strict follower of every Fed's rate decisions, there is now a possibility that the ECB ends up being the first one to pivot – as we note a historically high contraction of monetary supply M3 in Eurozone, and inflation lowering to the 2% target. Over the quarter, market participants kept scrutinizing every economic indicator release in order to anticipate future rate decisions. And as mentioned above, the resilience of the US economy and job market, as well as persistent inflation, have had the effect of curbing market expectations of rate cuts. The US 2y thus ended the month at 4.62% (up 41bp) and the US 10y at 4.25% (up 34bp). In Europe, the German 2y and 10y respectively yields at 2.85% (up 45bp) and 2.30% (up 28bp) at Q1-end. At the same time, credit spreads tightened in Europe – the Xover ended the month at -309bp (down 23bp), the Main at 55.6bp (down 5.1bp) – but remained flat in the US – CDX HY at 107.16 (up 1.23bp), CDX IG at 52.4 (down 4.9bp).

**SG Credit Millesime 2028** was launched in March 2023, with AuM rapidly growing (~€550mln as of 31-Mar). The fund displays a solid credit profile, with 75% of IG rated bonds, and a high sectorial diversification. Additionally, Moorea 2028 comes with a strong green & social bond allocation, representing a total 72% of the investments as of March-31. Through this allocation, we are able to participate in the funding of green projects (green bonds) as well as in SLBs (Sustainability-Linked Bonds, which requirements are at a company level the company and do not assess the "greenness" of a lone project). As a whole, this thematic meets a constantly growing demand from investors, notably institutional investors with a long term investment strategy. The Green bonds and SLBs are dynamic and growing markets, presenting regular new investment opportunities. All in all, the fund maintains a buy and watch approach, carefully monitoring the evolution of the fundamentals of the issuers and the achievements of the financed green projects. Since its launch in March of last year,

# GLOSSARY and DISCLAIMER

## ESG RATING

**MSCI ESG Ratings aim to measure a company's resilience to long-term, financially relevant ESG risks (Environment, Social et Gouvernance).** For each company a Weighted Average Key Issue Score is calculated based on the underlying Key Issue scores and weights. To arrive at a final letter rating, this score is normalized by industry. **The Industry Adjusted Score corresponds to a rating between AAA and CCC.** These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers.

\*The ESG quality score of the universe is adjusted for the 20% lowest ESG scores.

Letter Rating	CCC	B	BB	BBB	A	AA	AAA
Score	0 - 1.4	1.4-2.9	2.9-4.3	4.3-5.7	5.7-7.1	7.1-8.6	8.6-10

## CARBON FOOTPRINT

As key climate change indicators, Greenhouse gas emissions (GHG) are classified as per the Greenhouse Gas Protocol and are grouped in three categories:

- ▶ **Scope 1 - Direct scope:** GHG emissions are those directly occurring from sources that are owned or controlled by the institution.
- ▶ **Scope 2 - Indirect scope:** GHG emissions are indirect emissions generated in the electricity production consumed by the institution.
- ▶ **Scope 3 - Indirect scope:** GHG emissions are all the other indirect emissions that are consequences of the institution's activities, but that occur from sources not owned and controlled by the institution.

The uses MSCI data who are based on declarative or estimated figures from companies. It aims to take into account the GHG emissions of Scope 1 and 2, produced by the companies held in the portfolio. GHG emissions are compared to the sales of each company and adjusted with the security weight in the portfolio. Emissions are expressed in carbon dioxide equivalent (CO<sub>2</sub>e).

## SUSTAINABLE IMPACT REVENUES

Revenue exposure to Sustainable Impact Solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major social and environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from Sustainable Impact Solutions. To be eligible to contribute, an issuer must maintain minimum ESG standards.

## COVERAGE MSCI

The ESG MSCI rating does not cover all issuers, so it is important to display the coverage ratio to understand the rating. On this document, the rating coverage is displayed as a percentage (%), i.e. the percentage of covered securities on the entire portfolio.

# DISCLAIMER

*The content of this document should not be interpreted as an investment service or as investment advice, and under no circumstances is it to be used or considered as an offer or incentive to purchase or sell a particular product. The content is intended for information purposes only and to provide investors with the relevant reference information for any investment decisions. It has no regard to the specific financial objectives of any individual investor, nor may it be construed as legal, accounting or tax advice. Past performance is no indication of future results. Similarly, the present document is not intended as an incentive, offer or solicitation to invest in the asset categories listed herein. Investors are warned that the placing of stock market orders requires a perfect understanding of the markets and their governing legislation. Before investing, they must be aware that certain markets may be subject to rapid fluctuations and are speculative or lacking in liquidity. Accordingly, certain assets or categories of assets listed in the present document may not be appropriate for investors. In certain cases, investments may even bear an indeterminate high risk of loss that exceeds the initial investment made. Investors are therefore urged to seek the advice of their financial advisor or intermediary in order to assess the particular nature of an investment and the risks involved and its compatibility with their individual investment profile and objectives.*

*For Swiss investors: the Sub-Fund has been authorised for public sale by the Commission de Surveillance du Secteur Financier in Luxembourg and for public offering in Switzerland by the Swiss Financial Market Supervisory Authority (shortly 'FINMA'). The prospectus, the KIID (Key Investor Information Document) and annual reports of the Fund are available on the website [www.fundinfo.com](http://www.fundinfo.com) and can be obtained from our Representative and Paying Agent in Switzerland : Société Générale, Paris, succursale de Zurich, Talacker 50, Case postale 1928, 8021 Zurich.*

## CONTROVERSY

An ESG Controversy may be defined as an incident or ongoing situation in which a company faces allegations of negatively impacting stakeholders (i.e.: workers, communities, the environment, shareholders, or society at large), via some type of wrongdoing across several ESG indicators. The aim of ESG Controversies research is to assess the severity of the negative impact of each situation, rather than the extent of negative press attention or public opprobrium.

For each issuer, the ESG rating comes along with a Controversy flag which reflects the lowest flag among analyzed key indicators.

- ▶ **Green flag:** the company is not involved in major recent controversies
- ▶ **Yellow flag:** in recent moderate-to-severe level controversies
- ▶ **Orange flag:** one or more recent severe structural controversies that are ongoing
- ▶ **Red flag:** one or more recent very severe controversies

**Controversy flag translates also into controversy score:**

Red 0 - Orange 1 - Yellow 2 to 4 - Green 5 to 10

## SCIENCE-BASED TARGETS

Science-based targets provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their greenhouse gas emissions. Targets adopted by companies to reduce greenhouse gas (GHG) emissions are considered "science-based" if they are in line with the goals of the Paris Agreement –to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to 1.5°C.

## IMPACT INDICATORS

The impact indicators allow us to report on the environmental, social and governmental commitment of our investments in a relevant and sustainable manner. The six indicators displayed are not an exhaustive list, but were chosen by the management company. Women on the Board: This figure represents the percentage of women on the board of directors of companies. Independent directors: This figure represents the percentage of board members who meet the independence criteria defined by MSCI. For companies with a management and supervisory board, the calculation is based on supervisory board members only.

## UNITED NATIONS GLOBAL COMPACT

The United Nations Global Compact is a non-binding United Nations pact to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on their implementation. The UN Global Compact is a principle-based framework for businesses, stating ten principles in the areas of human rights, labor, the environment and anti-corruption. The UN Global Compact is the world's largest corporate sustainability initiative with 13000 corporate participants and other stakeholders over 170 countries with two objectives: "Mainstream the ten principles in business activities around the world" and "Catalyse actions in support of broader UN goals, such as the Millennium Development Goals (MDGs) and Sustainable Development Goals (SDGs)".

## ESG LUXFLAG LABEL

LuxFLAG is an independent, non-profit, international association created in Luxembourg in July 2006. The objective of the LuxFLAG ESG Label is to reassure investors that the labelled funds actually incorporate ESG (Environmental, Social and Governance) criteria throughout the entire investment process.
