MANAGEMENT COMMENTARY (QUARTERLY)

Launched at the very beginning of the year (Jan 15th), the fund performed relatively well displaying a performance of +6.82% over 2024. Its assets grew quickly as the NAV as of end of December is €383 million – vs. €311 million at the end of Q3 this year. As its name suggests, the fund invests in bonds which effective maturity is close to the 2029 target, offering investors a view on their future cash flows while benefiting from a strong diversification (currently 85 different issuers, 98 lines in total). The fund's average rating is still quite strong ('BBB-') and has prominent ESG/SRI footprint (67.5% of the bonds we invested in will use the proceeds in either green or social related projects). During the quarter, and similarly to the strategy of other Moorea funds, we favored high coupon bonds to continue benefiting from high carry effect. As we invested until the very end of 2024, we also benefited from the recent rate hikes. We namely purchased bonds like BARRY CALLEBAUT 4% 2029, IMERYYS 4.75% 2029, LA MONDIALE 4.375% Perp (issuer call option in 2029), PVH CORP 4.125% 2029, SIEMENS 4.25% 2029, VALEO 4.5% 2030, UNIBAIL 4.125% 2030. As of December 31st, the average duration of the fund stands at 3.90 while the average maturity reached 4.38 years. The average yield-to-maturity reaches 4.19% (yield-to-convention at 3.80%).
