## WHAT IS THIS PRODUCT?

**Type:** This product is a share of a Sub-Fund of Moorea Fund

**Term:** The Sub-Fund has a recommended holding period of 5 years.

**Objective:**

**Investment objective:** The investment objective of the Sub-Fund is to achieve the best possible investment returns over the pre-defined investment horizon, by investing in bonds that generate environmental benefits and whose selected issuers follow good governance and social practices.

**Investment policy:** To achieve this objective, the Sub-Fund will invest principally in a selection of bonds issued by corporate issuers. The majority of the bonds held in the portfolio will have a final maturity date before 30 June 2030. The Sub-Fund's investment strategy is to manage, on a discretionary basis, a diversified portfolio of debt securities among which euro denominated bonds, green & social bonds. The Sub-Fund may invest in all types of bonds (Investment Grade, High Yield or non rated bonds) in order to take advantage of all markets opportunities. The Sub-Fund will invest at least 51% of its assets in Investment Grade bonds. High Yield bonds (considered riskier or speculative) may represent up to 49% of the assets. The Sub-Fund will maintain a diversification in terms of geography, sectors and issuers.

**SFDR Category:** Article 8

**Benchmark:** The Sub-Fund is actively managed. The following indices are used as a universe from which to select securities: BofA Euro Corporate (ER00) Index and BofA Euro High Yield BB (HE10 Index). The index ICE BofA 3-5 Year Euro Corporate (ER02 Index) may be used for performance comparison. This benchmark is not intended to be consistent with the sustainable investment objective of the Sub-Fund.

**Income:** Accumulation share class, the dividend is reinvested.

**Investment horizon:** The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years or until 31/12/2029.

**Currency:** Your shares will be denominated in EUR, which is the Fund's base currency.

**Processing and redemption orders:** Subscription and redemption orders must be received by the custodian before 5 p.m. (Luxembourg time) on Friday. The net asset value is calculated on a weekly basis on the Tuesday of each week or, if this day is not a business day as defined in the general part of the prospectus, on the next business day.

**Depositary:** Société Générale Luxembourg

**Intended Investor:** This share class is intended for all investors. The fund is dedicated to investors who have neither financial expertise nor any specific knowledge to understand the Sub-Fund but nevertheless may bear total capital loss. It is suitable for investor who seeks growth of capital. Potential investors should have an investment horizon of at least 5 years.

## WHAT ARE THE RISKS AND WHAT COULD I GET BACK IN RETURN?

### Risk indicator

Lower Risk ← → Higher Risk

**The risk indicator assumes you keep the product until 31 December 2029.**

The summary risk indicator is a guide to the level of risk of this

product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

## WHAT ARE THE RISKS AND WHAT COULD I GET BACK IN RETURN ? (continued)

### Performance Scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are illustrations using the worst, average, and best performance of the product, which may include input from benchmark / proxy, over the last ten years. The figures are not an exact indicator, markets could develop very differently in the future. What you get will vary depending on how the market performs and how long you keep the investment/product.

**Recommended Holding Period: 5 year(s)**

**Investment = \$ 10,000**

Scenarios		If you exit after 1 year	If you exit after 5 years
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	<b>What you might get back after costs</b>	<b>\$7,140</b>	<b>\$7,030</b>
	Average return each year	-28.6%	-6.8%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>\$8,240</b>	<b>\$8,720</b>
	Average return each year	-17.6%	-2.7%
<b>Moderate</b>	<b>What you might get back after costs</b>	<b>\$9,560</b>	<b>\$10,160</b>
	Average return each year	-4.4%	0.3%
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>\$10,130</b>	<b>\$10,590</b>
	Average return each year	1.3%	1.1%

The figures include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: October 2017 and November 2022

Moderate Scenario: September 2016 and September 2021

Favourable Scenario: July 2014 and July 2019

## WHAT HAPPENS IF Société Générale Private Wealth Management S.A. IS UNABLE TO PAY OUT?

Société Générale Private Wealth Management (SGPWM) is a management company licensed and supervised by the CSSF. SGPWM complies with organizational and operational rules, in particular as regards capital requirements. A separate pool of assets is invested and maintained for each Sub-Fund. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the management company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the management company or any delegated service provider were to fail or default.

## WHAT ARE THE COSTS?

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures are estimates and may change in the future. You should note that these costs are paid by the Company whereas the return that you may receive will depend on the Company's share price performance. There is no direct link between the Company's share price and the costs that it pays.

### Costs over time

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	<b>\$700</b>	<b>\$1,310</b>
<b>Annual cost impact (*)</b>	7.0% each year	2.5% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.8% before costs and 0.3% after costs.

**Table 2: Composition of costs**

<b>One-off costs</b>		<b>If you exit after 1 year</b>
